

AI Training for Every Desk, Every Role, Every Future

The future of every company will be shaped not just by technology, but by people who know how to use AI responsibly and effectively. To unlock AI's full potential, organisations must embed knowledge at all levels

- from the Board of Directors and senior management to middle managers and staff
- building competitive advantages in efficiency and innovation, ensuring responsible compliance, and equipping employees with future-ready skills to drive growth and trust.
- This training initiative is a significant upgrade in workforce capability, giving teams the equivalent of "a team of AI-literate level experts in their pocket." AI is the defining technology of our era
- let's make sure every member of your organisation has the tools to harness it responsibly and strategically.

General / Corporate AI Training

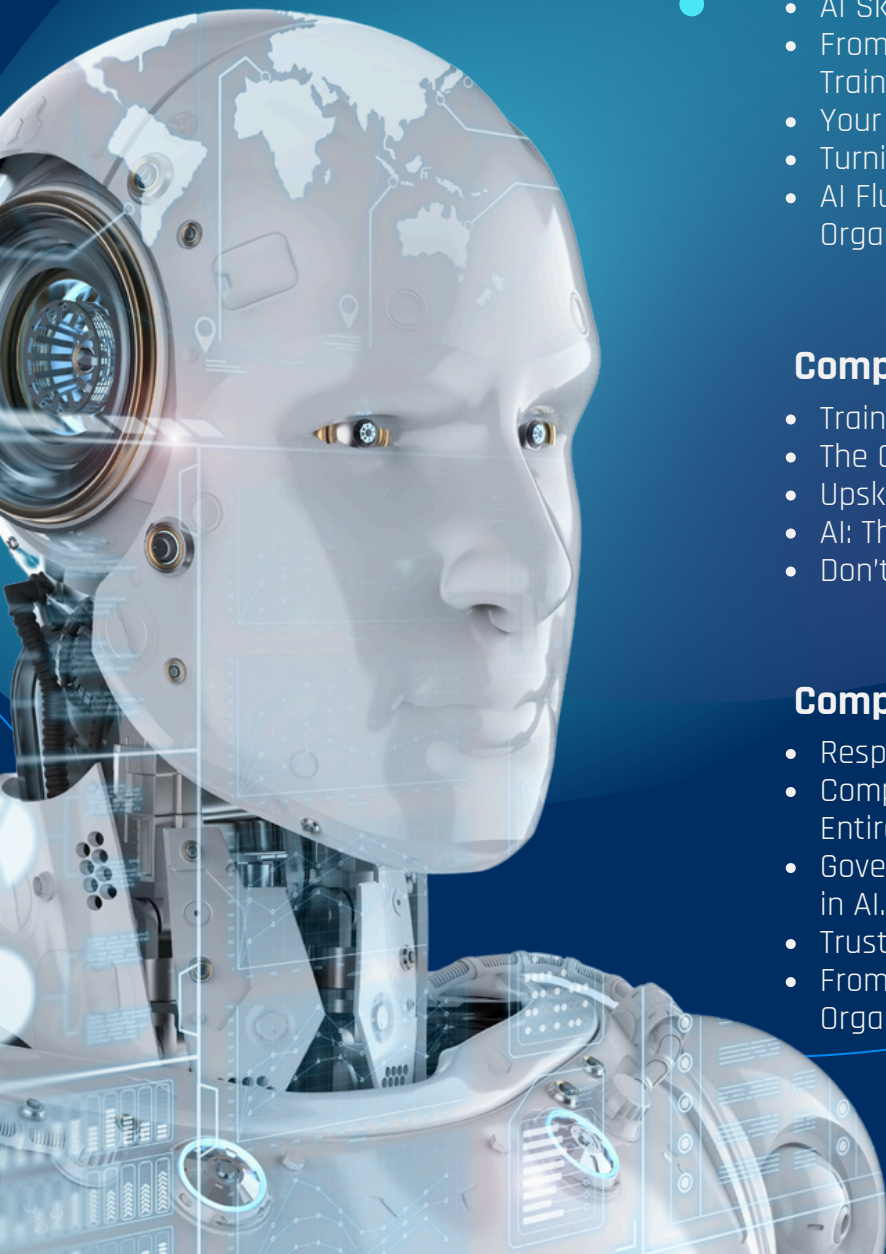

- AI Skills for Every Desk.
- From the Boardroom to the Frontline: AI Training for All.
- Your Workforce, Future-Ready with AI.
- Turning Staff into AI-Savvy Professionals.
- AI Fluency Across Every Level of the Organization.

Competitive Advantage & Growth

- Train Today. Lead Tomorrow.
- The Companies That Train in AI Will Win in AI.
- Upskill Your Teams, Unlock AI Advantage.
- AI: The Skill That Redefines Corporate Growth.
- Don't Just Adopt AI—Equip Your People to Master It.

Compliance, Governance & Trust

- Responsible AI Starts with Trained Staff.
- Compliance Meets Capability: AI Training for the Entire Workforce.
- Governance Is People, Not Just Policies—Train Them in AI.
- Trustworthy AI Begins with Knowledge.
- From Policy to Practice: Making AI Work Across Your Organization.

Copenhagen Compliance Corporate AI Training Initiative

The **Copenhagen Compliance Group**, together with the **Information Security Institute** and the **Corporate Governance Institute**, continues its commitment to guiding organizations toward the values and advantages of the AI-driven future. After the successful launch of our flagship programs—**AICP** (1-day Compliance Certification), **DAIG** (2-day AI Governance Certification), and **CAIO** (3-day Chief AI Officer Certification)—we are proud to announce a new initiative: **certifying corporate staff at all levels with tailored AI knowledge and skills.**

Why Now?

Studies consistently show that **AI-savvy professionals are more valuable, more productive, and earn higher compensation** than their peers without AI expertise. Last year alone, our workshops, seminars, and online learning programs connected hundreds of IT leaders, compliance officers, lawyers, accountants, and executives with the resources, toolkits, and communities they need to master AI tools.

The Next Step

We are now expanding the **E-Compliance Academy** with **customized corporate AI training programs**, designed to meet the needs of different staff levels—from basic AI literacy (1-2 hours) to advanced AI applications like **prompt engineering and AI-enabled job functions lasting a couple of hours or more.**

Equip leaders and employees alike with the knowledge to drive responsible AI adoption, compliance, and innovation.

From governance to growth, AI literacy is the new competitive advantage

Our Approach

- **Customised Learning:** Programs aligned with corporate roles and sector-specific requirements
- **Hands-On Experience:** Practical exercises for real workplace impact
- **Scalable Solutions:** Training modules for staff across business functions and hierarchies

Why It Matters

The future of every company will not be shaped by technology alone, but by **people who know how to use AI responsibly and effectively**. By embedding AI knowledge into your workforce, you can:

- Build **competitive advantages** in efficiency and innovation
- Ensure **responsible AI implementation and compliance**
- Empower staff with **future-ready skills** to drive growth and trust

This initiative is **a significant upgrade in workforce capability**, bringing the equivalent of “a team of Ph.D.-level experts in your pocket” to every associate. It is not just about technology—it is about **expanding opportunity and reshaping the corporate playbook**.

AI is the defining technology of our era. Let's ensure that every member of your workforce has the tools to harness it.
